

SAFETY DATA SHEET

## **Pure Flush**

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200

| 1. Identification                |   |
|----------------------------------|---|
| Product identifier               |   |
| Product name                     | Pure Flush  |
| Product number                   | L0816-054, L0816-057, L0816-060, L0816-062, L0816-072   |
| NSF Registration Number          | 126121  |
| Recommended use of the che       | emical and restrictions on use  |
| Application                      | Food grade lubricating oil  |
| Uses advised against             | No specific uses advised against are identified.  |
| Details of the supplier of the s | afety data sheet  |
| Manufacturer                     | Lubriplate Lubricants Co.<br>Corporate Headquarters<br>129 Lockwood Street<br>Newark, NJ 07105  |

| Emergency telephone              | Chem-Tel: 1-800-255-3924 (US & Canada only)<br>01-813-248-0585 (Outside US & Canada)            |
| 2. Hazard(s) identification      |   |
| Classification of the substance  | e or mixture  |
| Physical hazards                 | Not Classified  |
| Health hazards                   | Asp. Tox. 1 - H304  |
| Environmental hazards            | Not Classified  |
| Label elements                   |   |
| Pictogram                        |   |
|                                  |   |
| Signal word                      | Danger  |
| Hazard statements                | H304 May be fatal if swallowed and enters airways.  |

1/10

| Precautionary statements | P301+P310 If swallowed: Immediately call a poison center/ doctor.<br>P331 Do NOT induce vomiting.<br>P405 Store locked up. |
|--------------------------|--|
| Contains                 | White mineral oil (petroleum)  |

## Other hazards

This product does not contain any substances classified as PBT or vPvB.

| 3. Composition/information on ingredients                           |  |
|---|--|
| Mixtures  |  |
| White mineral oil (petroleum)<br>CAS number: 8042-47-5              | 60-100%  |
| <b>Classification</b><br>Asp. Tox. 1 - H304                         |  |
| The full text for all hazard statements is displayed in Section 16. |  |
| Composition comments  | * The exact percentage withheld as a trade secret in accordance with 29 CFR 1910.1200.   |
| 4. First-aid measures   |  |
| Description of first aid measur                                     | es   |
| General information   | Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.   |
| Inhalation  | Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.   |
| Ingestion   | Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water<br>or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head<br>should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an<br>unconscious person. Move affected person to fresh air and keep warm and at rest in a<br>position comfortable for breathing. Place unconscious person on their side in the recovery<br>position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing<br>such as collar, tie or belt. |
| Skin Contact  | Rinse with water.  |
| Eye contact   | Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.  |
| Protection of first aiders  | First aid personnel should wear appropriate protective equipment during any rescue. If it is suspected that volatile contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.  |
| Most important symptoms and   | effects, both acute and delayed  |
| General information   | See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.   |
| Inhalation  | Prolonged inhalation of high concentrations may damage respiratory system.   |

| Ingestion  | Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation. Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.  |  |
|--|---|--|
| Skin contact   | Prolonged contact may cause dryness of the skin.  |  |
| Eye contact  | May cause temporary eye irritation.   |  |
| Indication of immediate medica                       | Indication of immediate medical attention and special treatment needed  |  |
| Notes for the doctor                                 | Treat symptomatically.  |  |
| 5. Fire-fighting measures                            |   |  |
| Extinguishing media                                  |   |  |
| Suitable extinguishing media                         | The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.  |  |
| Unsuitable extinguishing media                       | Do not use water jet as an extinguisher, as this will spread the fire.  |  |
| Special hazards arising from th                      | e substance or mixture  |  |
| Specific hazards                                     | Containers can burst violently or explode when heated, due to excessive pressure build-up.  |  |
| Hazardous combustion<br>products                     | Thermal decomposition or combustion products may include the following substances:<br>Harmful gases or vapors.  |  |
| Advice for firefighters                              |   |  |
| Protective actions during firefighting               | Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities. |  |
| Special protective equipment<br>for firefighters     | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves will provide a basic level of protection for chemical incidents.   |  |
| 6. Accidental release measures                       | S   |  |
| Personal precautions, protectiv                      | e equipment and emergency procedures  |  |
| Personal precautions                                 | No action shall be taken without appropriate training or involving any personal risk. Keep<br>unnecessary and unprotected personnel away from the spillage. Wear protective clothing as<br>described in Section 8 of this safety data sheet. Follow precautions for safe handling<br>described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure<br>procedures and training for emergency decontamination and disposal are in place. Do not<br>touch or walk into spilled material.      |  |
| Environmental precautions                            |   |  |
| Environmental precautions                            | Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).  |  |
| Methods and material for containment and cleaning up |   |  |

| Methods for cleaning up                                      | Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills<br>immediately and dispose of waste safely. Approach the spillage from upwind. Small Spillages:<br>If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or<br>if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable<br>waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area.<br>Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and<br>absorb spillage with sand, earth or other non-combustible material. Place waste in labeled,<br>sealed containers. Clean contaminated objects and areas thoroughly, observing<br>environmental regulations. The contaminated absorbent may pose the same hazard as the<br>spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing<br>with a spillage. Dispose of waste to licensed waste disposal site in accordance with the<br>requirements of the local Waste Disposal Authority. |
|--|---|
| Reference to other sections                                  | For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.   |
| 7. Handling and storage                                      |   |
| Precautions for safe handling                                |   |
| Usage precautions  | Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.  |
| Advice on general occupational hygiene                       | Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.   |
| Conditions for safe storage, including any incompatibilities |   |
| Storage precautions  | Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Utilize retaining walls to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.   |
| Storage class  | Chemical storage.   |
| Specific end uses(s)   |   |
| Specific end use(s)  | The identified uses for this product are detailed in Section 1.   |
| 8. Exposure controls/Personal protection                     |   |
| Control parameters   |   |
| Occupational exposure limits                                 |   |
| White mineral oil (petroleum)                                |   |
| Minaral Oil Miate ACCILL TMA                                 |   |

Mineral Oil Mist: ACGIH TWA: 5 mg/m3, STEL: 10 mg/m3 Long-term exposure limit (8-hour TWA): 5 inhalable fraction

## Exposure controls

### Protective equipment

| Appropriate engineering controls    | Provide adequate ventilation. Personal, workplace environment or biological monitoring may<br>be required to determine the effectiveness of the ventilation or other control measures and/or<br>the necessity to use respiratory protective equipment. Use process enclosures, local exhaust<br>ventilation or other engineering controls as the primary means to minimize worker exposure.<br>Personal protective equipment should only be used if worker exposure cannot be controlled<br>adequately by the engineering control measures. Ensure control measures are regularly<br>inspected and maintained. Ensure operatives are trained to minimize exposure.   |
|-------------------------------------|--|
| Eye/face protection                 | Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.   |
| Hand protection                     | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.           |
| Other skin and body<br>protection   | Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.  |
| Hygiene measures                    | Provide eyewash station and safety shower. Contaminated work clothing should not be<br>allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment<br>and the work area every day. Good personal hygiene procedures should be implemented.<br>Wash at the end of each work shift and before eating, smoking and using the toilet. When<br>using do not eat, drink or smoke. Preventive industrial medical examinations should be carried<br>out. Warn cleaning personnel of any hazardous properties of the product.  |
| Respiratory protection              | Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is NIOSH approved. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with OSHA 1910.134. Full face mask respirators with replaceable filter cartridges should comply with OSHA 1910.134. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134. |
| Environmental exposure controls     | Keep container tightly sealed when not in use.   |
| 9. Physical and chemical properties |  |

| Persistence and degradability                                 | The degradability of the product is not known.   |
| Bioaccumulative potential                                     |  |
| Bio-Accumulative Potential                                    | No data available on bioaccumulation.  |
| Partition coefficient   | Not available.   |
| Mobility in soil  |  |
| Mobility  | No data available.   |
| Other adverse effects   |  |
| Other adverse effects   | None known.  |
| 13. Disposal considerations                                   |  |
| Waste treatment methods                                       |  |
| General information   | The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous. |
| Disposal methods  | Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Incineration or landfill should only be considered when recycling is not feasible.  |
| 14. Transport information                                     |  |
| General   | The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT).   |
| UN Number   |  |
| UN No. (International)  | Not applicable.  |
| UN proper shipping name                                       |  |
| Proper shipping name<br>(International)                       | Not applicable.  |
| Transport hazard class(es)                                    |  |
| Transport Labels<br>(International)                           | No transport warning sign required.  |
| Transport labels<br>No transport warning sign required.       |  |
| <b>DOT transport labels</b><br>No transport warning sign requ | uired.   |
| Packing group   |  |
| Packing group (International)                                 | Not applicable.  |

#### **Environmental hazards**

Environmentally Hazardous Substance No.

#### Special precautions for user

Not applicable.

**DOT TIH Zone** Not applicable.

### Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

15. Regulatory information

#### **US Federal Regulations**

SARA Section 302 Extremely Hazardous Substances Tier II Threshold Planning Quantities None of the ingredients are listed or exempt.

#### CERCLA/Superfund, Hazardous Substances/Reportable Quantities (EPA)

None of the ingredients are listed or exempt.

#### SARA Extremely Hazardous Substances EPCRA Reportable Quantities

None of the ingredients are listed or exempt.

#### SARA 313 Emission Reporting

The following ingredients are listed or exempt:

Dec-1-ene, homopolymer, hydrogenated.dec-1-ene, oligomers, hydrogenated 1.0 %

#### **CAA Accidental Release Prevention**

None of the ingredients are listed or exempt.

#### FDA - Essential Chemical

None of the ingredients are listed or exempt.

### FDA - Precursor Chemical

None of the ingredients are listed or exempt.

### SARA (311/312) Hazard Categories

None of the ingredients are listed or exempt.

#### OSHA Highly Hazardous Chemicals

None of the ingredients are listed or exempt.

#### **US State Regulations**

California Proposition 65 Carcinogens and Reproductive Toxins None of the ingredients are listed or exempt.

### California Air Toxics "Hot Spots" (A-I) None of the ingredients are listed or exempt.

### California Air Toxics "Hot Spots" (A-II)

None of the ingredients are listed or exempt.

### California Directors List of Hazardous Substances

None of the ingredients are listed or exempt.

### Massachusetts "Right To Know" List None of the ingredients are listed or exempt.

### Rhode Island "Right To Know" List

None of the ingredients are listed or exempt.

Minnesota "Right To Know" List None of the ingredients are listed or exempt.

New Jersey "Right To Know" List None of the ingredients are listed or exempt.

## Pennsylvania "Right To Know" List

None of the ingredients are listed or exempt.

### Inventories

US - TSCA All the ingredients are listed or exempt. *White mineral oil (petroleum) Ester* 

alkyl naphthalene sulfonic acid, calcium salt

### US - TSCA 12(b) Export Notification

None of the ingredients are listed or exempt.
